VELODROME

TRISTAN GARNER AND WILL NEAL

Boston Studio / Cal Lewis / Spring 2011

An immense facility that uses the river side site to its full potential. The elevated and ground level walkways create an efficient way to move people during events while allowing a stroll through the park on an off-day. A cable tension roof creates a unified system from top to bottom while allowing unique daylighting into the event bowl. The multi-axis roof rim keeps a low profile to the site, accents the entrances and creates a new Boston icon along the Charles River.
